

Method

The organisation of conference sessions is interesting. Following Breakout Sessions, which briefly outline the problem to be addressed, the 13 Thematic Working Groups move into discussion where they link their work closely to the conference theme. They identify key issues: dilemmas, double binds, and challenges.

They then invite two or more of the other Working Groups to critique their thinking, and to discuss joint action. This is summarised in a poster presentation, and from a list of possible strategies for policy makers, practitioners, and researchers, they recommend advances in IT in Education.

Outcomes

The outputs of the conference are disseminated in a number of ways:

IT Advances in Education – book form

E-Book edited by Petra Fisser

ETR&D edited by Joke Voogt and Gerald Knezek

CJLT edited by Professor Margaret Cox and Professor Thérèse Laferrière

Social media: Twitter, blog (like this one), websites (like World Ecitizens) organised by MirandaNet and WE.
